Compuflex Announces Support for ARCA's New CM18 Solo

Compuflex Corporation has certified that its Universal Cash Management (UCM) System fully supports the Arca CM18 SOLO Recycler

Springfield, NJ – Today, Compuflex Corporation, a cash handling solution provider with over 30 years of experience, announced that its Universal Cash Management (UCM) product fully supports the new ARCA CM18 Solo cash recycler. This Arca recycler product, which is meant for a single user, is plug compatible with the currently supported ARCA CM18 recycler. The CM18 SOLO is an esthetically simplified member of the company's CM18 product family.

Compuflex's CEO and founder, Jim Clements had the following to say about the announcement:

“

The ARCA CM18 SOLO is an intriguing product whose modest footprint, overall design simplicity and backward interface compatibility with existing products should result in very favorable market acceptance.

”

A technical release document will be made available to Compuflex UCM clients.

Compuflex has been a global provider of cash handling solutions since 1983.

Over that time, we have delivered over 20,000 technology solutions and are considered the leader in Universal Teller Cash Automation Solutions.

Compuflex's state of the art technology supports just about every type of cash handling equipment on the market today.
