## **Compuflex Announces Support for the Hyosung MS400 and MS500 in UCM Release 8.0.0**

Compuflex Corporation has certified that its Universal Cash Management (UCM) version 8.0.0 system fully supports the Hyosung MS400 and MS500

**Springfield, NJ** – Today, Compuflex Corporation, a cash handling solution provider with over 30 years of experience, announced its release of Universal Cash Management (UCM) version 8.0.0. This new version provides support for the MS400 and MS500 with firmware version 03.00.02.01.

Compuflex's CEO and founder, Jim Clements had the following to say about the announcement:

“

The Hyosung MS400 and MS500 recyclers are cassette-based units which typically support a larger note capacity and employ enhanced features such as self audit.

”

A technical release document will be made available to Compuflex UCM clients.

Compuflex has been a global provider of cash handling solutions since 1983.

Over that time, we have delivered over 20,000 technology solutions and are considered the leader in Universal Teller Cash Automation Solutions.

Compuflex's state of the art technology supports just about every type of cash handling equipment on the market today.
