

Compuflex's MiniTerminal is designed as a compact yet powerful unit that provides independent control of automatic cash dispensers.

The MiniTerminal is a powerful and versatile device that can perform both normal dispenses and vault buy dispenses interchangeably.

The terminal itself is capable of storing a large amount of transaction data.

FEATURES

- ☛ Simple key layouts and intuitive interface.
- ☛ Dispense automatically or allow nomination.
- ☛ Customizable auto dispense bill mix.
- ☛ Vault Buy: terminal can operate as a dedicated vault buy station, or a combination of teller station + vault buy.
- ☛ User warned when cassette inventory reaches low limit.
- ☛ Searchable electronic audit trail which you can print continuously or store electronically.
- ☛ Ability to clear teller totals, station totals, and entire dispenser totals.
- ☛ Allow/prevent partial dispenses.
- ☛ Ability to set maximum number of notes per dispense.
- ☛ Enable/disable inventory tracking.
- ☛ Application software updatable in the field via PC link.

Security Features

- ☛ Store up to 50 user profiles.
- ☛ 3 access levels: teller, supervisor, and manager. (Tellers can dispense and clear own reports; supervisors can perform all teller functions plus load inventory and perform some terminal maintenance operations, excluding setting up new users; managers can perform all maintenance operations, including setting up new users).
- ☛ Sign on requires user ID (up to 9 digits) and PIN (up to 9 digits).
- ☛ Users create own original PIN.
- ☛ Password expires after specified number of days.
- ☛ Restrict Logoff: prevents tellers from seeing menu option for entering maintenance mode.
- ☛ Idle mode lockout: if system is idle for specified number of minutes requires current teller PIN to continue.
- ☛ System lockout occurs after incorrect PIN entered three consecutive times-requires manager ID and PIN to continue.
- ☛ Set daily dispense limit for individual tellers.
